The 2013 High-Energy-Density-Physics (HEDP) Summer School, organized by the University of Rochester Fusion Science Center, will be held at The Ohio State University, July 14 – 20, 2013. The Summer School is for those undergraduate seniors, graduate students, postdocs, and researchers who wish to enter, or advance their knowledge in, this new and exciting field of HEDP and inertial confinement fusion. Lecture topics include radiation transport and spectroscopy, hydrodynamics, laser–plasma interactions, and experiment diagnostics, along with other ongoing research activities in the area of HEDP. About 50 scholarships covering meals, lodging, and travel expenses are available to the undergraduate seniors, graduate students, and postdoc participants (register by February 18, 2013). Applicants for the scholarships should include their resume and have two letters of reference sent (in .pdf format) to hedp.registrar@lle.rochester.edu. Those who are interested in attending the Summer School can visit the website http://hedpschool.lle.rochester.edu and submit an application there. The proceedings of the 2009 and 2011 Summer Schools can be found at http://hedpschool.lle.rochester.edu.

The HEDP summer school is sponsored by the Fusion Science Center, the Institute for Laser Science and Applications at Lawrence Livermore National Laboratory, and General Atomics.

For further assistance please contact Mrs. Margaret Kyle (mkyl@lle.rochester.edu) or Prof. Chuang Ren (cren@lle.rochester.edu) of the University of Rochester.
